

# PaediaSure Peptide

1.0 kcal/ml complete, balanced, peptide-based liquid for children weighing 8-30 kg<sup>1</sup>

## PRESENTATION

- Presented in a 200 ml (200 kcal) bottles and 500 ml (500 kcal) Ready to Hang (RTH) containers.
- PaediaSure Peptide is available in vanilla flavour.

## USES

Food for Special Medical Purposes, for use under medical supervision. Suitable as a sole source of nutrition or as a nutritional supplement for children who cannot or will not eat sufficient quantities of everyday food and drink to meet their nutritional requirements.

Nutritionally complete for vitamins and minerals in 778 ml for children aged 1-3 years, 1111 ml for children aged 4-6 years and 1667 ml for children aged 7-10 years (excluding electrolytes, calculated using the UK Reference Nutrient Intake for these age bands).

## COMMUNITY USE—PRESCRIPTIONS

Can be prescribed on a FP10 (GP10 in Scotland) for the following indications in children weighing 8-30 kg:

- Disease-related malnutrition and/or growth failure
- Short bowel syndrome
- Bowel fistulae
- Intractable malabsorption
- Pre-operative preparation of patients who are malnourished
- Dysphagia

All prescriptions should be endorsed ACBS (Advisory Committee on Borderline Substances).

## STORAGE & DIRECTIONS FOR SIP FEEDING

- Store unopened at room temperature and avoid prolonged exposure of the RTH container to light.
- Ready for use. Open immediately prior to use.
- Shake well before use.
- Best served chilled.
- Once opened, unused product should be resealed and stored in a refrigerator. Unused contents should be discarded after 24 hours.
- Date and time of opening can be recorded on the lid sticker.

## DIRECTIONS FOR TUBE FEEDING

- Ready for use.
- Administer at room temperature for tube feeding.
- The volume/flow rate should be adjusted to meet the patient's nutritional needs and tolerance. This product has a low viscosity and will pass down a fine bore nasogastric tube.
- The 200 ml reclosable plastic bottle and the 500 ml RTH container will attach to all Abbott Nutrition giving sets.
- A Flexitainer enteral nutrition container may be used if decanting is necessary.
- For gravity feeding, the use of a Flexiflo gravity gavage set is recommended.
- An Abbott enteral feeding pump may be used in conjunction with the Abbott enteral feeding system where a more accurately controlled delivery of feed is indicated. An ambulatory system is available.

## PRECAUTIONS

- In patients receiving some medications there may be a risk of drug nutrient interactions (e.g. warfarin and vitamin K). Careful prescribing and monitoring practices will serve to reduce the risk (please refer to pharmacist).
- Patients should not make any additions to the feed without consulting their pharmacist or dietitian.
- Many nutritional products contain sucrose and other sugars. It is important for patients who are taking supplements as sip feeds to observe good oral hygiene. It is suggested that patients consult their dentist for further advice.
- When feeding to patients with dysphagia, please thicken the product as appropriate.

## CONTRA-INDICATIONS

- FOR ENTERAL USE ONLY.
- Do not use in children under 1 year of age.
- Not for use in galactosaemia.
- Suitable for people with diabetes provided that routine glucose checks are performed.

## INGREDIENTS

Water, maltodextrin, sucrose, whey protein hydrolysate (*milk* protein), MCT oil from palm kernel oil, canola oil, hydrolysed sodium caseinate (*milk* protein), flavouring, potassium citrate, tricalcium phosphate, potassium chloride, emulsifier: E322 (*soy* lecithin), magnesium phosphate dibasic, sodium citrate, choline bitartrate, potassium phosphate dibasic, stabiliser: E407, vitamin C, m-inositol, taurine, L-carnitine, ferrous sulphate, zinc sulphate, vitamin E, niacin, calcium pantothenate, copper sulphate, manganese sulphate, thiamin (vitamin B<sub>1</sub>), riboflavin (vitamin B<sub>2</sub>), vitamin A, vitamin B<sub>6</sub>, sodium fluoride, folic acid, potassium iodide, sodium molybdate, chromium chloride, sodium selenite, biotin, vitamin K, vitamin D, vitamin B<sub>12</sub>.

1. All of the protein in this product has been hydrolysed to form peptides. This may be referred to as a 'semi-elemental' or 'partially-hydrolysed' feed elsewhere.
2. Vitamin D is synthesised from cholesterol, extracted from the grease in wool sheared from live sheep.
